Delaware County Fire Police Association

In conjunction with the nerds at w3

PRESENTING THE 2023
FIRE POLICE REPORTING SOFTWARE PACKAGE

This software provides a way for your fire police personnel to easily create reports after incidents including who responded, what they did, and how long they did it.

How it works

Each member can logon to create incident reports, customized to your organization's specific apparatus, tasks, locations, etc. Dispatch integration is also available to get pre-populated data. Saving time, energy, and effort while also providing additional reports and statistics on how you contribute to your community.

Software Pricing

The Delaware County Fire Police Association is providing fire police organizations within Delaware County free access to fire police reporting software in an effort to provide more resources that increase safety, mutual aid efficiency, retention, and provide useful statistics when applying for grants or municipal money.

Benefits

Cloud & Mobile Reporting

create reports on your mobile device, laptop, or desktop from anywhere with an internet connection

Statistics

informational summary reports including in service hours, personnel hours, task counts, and more

Documentation

future reference for legal requirements and post-incident review
